

1 Mon

Reveille at 30 a.m.

A fearful day for dust so thick you couldn't see just like a heavy fog only 100 times more disagreeable. Paulsen did not come over last night, but were over early this morning. Our anti-air-craft guns kept them up very high & they didn't bomb. Tucker rotten today as we are using up our snow rations. This takes place about once a month.

2 Tues

Did some shooting today with gas helmets on & in a gas cloud not too much gas though mostly smoke bomb.

I transferred today from 1st Squadron to 2nd Squadron. They are more Ulagos & 8th Canterbury men in here than in any other squad, & I'd sooner be in with men from my own part of the country.

I stufed my gear over in the afternoon & am now set in a new troop with new horse saddle & gear.
