

9 Tues

Reveille 4-45 a.m.

We were out on an attack scheme today & had some tough gallops & jumps over Bedouin fences which are made of earth walls. We joined up with Australians for the day & had quite a good outing brought our horses home very tired after so much galloping. I killed a snake on our way home put it half through with my bayonet. it was 4 ft long

10 Wed

Reveille 5 a.m.

After breakfast there wasn't much doing so I with another chap rode over to the aerodrome to see the plane that was brought down a few days ago. It is a splendid machine an Aviator Scout built this year 1917. The aviator was the oldest flier on this front & said he had been here three years. He was a German with the rank of Captain. No more excitement for the rest of this day. Bed. 9-30 p.m.
