HOW TO CUT A BOTTLE. Take a piece of string large enough to go round bottle and saturate it in methylated Spirits. Fill the bottle with hot water, tie the string tightly round the bottle at the place you wish to cut it, then light the string. Repeat this two or three times (the number depending on the thickness of the glass) making sure the string is in exactly the same place each time. Hold the bottle in your hand and hit it with the handle of a knife. A.
