arr Cologne 4/3/1919

A HANDY FIRST AID KIT. This First Aid Kit is a big canvas belt divided into as many pockets as one wishes. Into each pocket can be put a bottle of some sort of medicine or bandages. At the ends of the belt fold the corners back and sew them. Then take a strap, cut it in two about three or four inches from each end. Take these pieces and sew or rivet one to each end of the belt so that you can wear the belt round your waist. A.
