11 Mon

12 Tues—● New Moon, 7.52 p.m.

13 Wed

AN EMERGENCY PACK SACK. This pack sack can be made of an old sack and a piece of rope. If rope is used it should be fitted with a pad to protect the shoulders. A loop is made in the centre of the strap as at A, the ends B being long enough to tie at the bottom corners of the pack. The loop A is more clearly shown at C. At the bottom the corners are tied as shown at D, after placing a round stone inside each. A.
