A HANDY BRAZIER. The best substitute for a stove is the brazier. To make a brazier take a petrol tin and rip the top round three edges, bending it up flush with the side of the can so that the handle may still be used for carrying it about. The sides and the bottom are then punched with a number of fairly large holes. One brazier full of coal will last about three hours, the can being roughly 12 in. by 10 in. by 6 in.
