February 1915
58 Days

21 Sun 59-313 They seem to be thousands of small chalices. The other two
be thousands of small chalices. The other two
22 Mon 59-312 chambers are of granite and the
of granite and the
23 Tu 54-311 roofing is in general
roofing is in general
24 Wed 55-310 one is roofed
one is roofed
25 Th 56-309 with a single block
with a single block

The four small
chambers are the same size. The place not being
drawn to scale.

26 Fri 57-308 From the
From the

spring we rode upwards
upwards
about half a mile to the
the

smallest of the three large pyramids, that of the King Menkaure, as
as we approached it you can

27 Sat 59-307 see the edge of the
see the edge of the
air shaft about half way up the side. The stones
the stones

have been displaced around
around
it, apparently, in the search
for an inlet into the interior.
The actual inlet is on the
bottom level of the pyramid.
The passage inside running
down very steeply into the solid rock. On entering
through the opening you find yourself in a very
narrow way which it cut down

through the solid rock.
