You may have heard over the B.B.C.
from time to time about a new
American fighter plane called
the "Lightning". They have been in
operation in Tunisia - in the Pacific.
Well, I saw one a few days ago, &
what an unusual plane it was.
It has two engines & two bodies,
but the pilot sits in a stream-
lined cabin in the centre. This
plane is very fast & can do
more than 400 m.p.h. The one
I saw was painted blue & was
named "Little Edna". I also saw
the new British "Mosquito" bomber
which can do 400 m.p.h. They
